

Prescription Diet Gastrointestinal Biome Canine

Clinically proven to resolve diarrhoea in as little as 24 hours and promote healthy regular stool*.

GI Biome

Recommended for:

- Fibre-responsive enteropathies
- Antibiotic-responsive diarrhoea
- Steroid-responsive enteropathies
- Constipation
- Diarrhoea

Not recommended for:

- Conditions requiring highly digestible food
- Growth/reproduction
- Chronic kidney disease
- Heart disease

Additional information:

- **Hill's Prescription Diet Gastrointestinal Biome** with ActivBiome+ Technology nourishes and activates the gut microbiome to release gut nourishing postbiotics – short-chain fatty acids, anti-inflammatory polyphenols and antioxidant compounds.
- Clinically proven to limit future episodes of diarrhoea in 100% of dogs¹
- For optimal recovery from acute GI disease, recommend feeding this food for at least 7 days (1-2 weeks for acute cases, 3-12 weeks for maldigestion or long-term as needed).

Other products to consider:

- For patients with colitis, gastroenteritis, vomiting or chronic enteropathy/inflammatory bowel disease (IBD): **Hill's Prescription Diet z/d Canine, Prescription Diet d/d Canine**
- For obese prone patients with fibre-responsive GI conditions consider **Hill's Prescription Diet w/d Canine**
- For patients with pancreatitis: Hill's **Prescription Diet i/d Low Fat Canine, Prescription Diet i/d Stress Mini Canine**
- For dogs up to 14 kg with stress-related GI disorders, including stress colitis: **Hill's Prescription Diet i/d Stress Mini Canine**
- For puppies with GI disorders: **Hill's Prescription Diet i/d Canine**

Digestive Care

Reduces the risk of struvite and oxalate stones
