CCS VETS

PREPPING FOR PRIVATE PRACTICE

Welcome CCS Vets of 2026!

The move from your CCS year into private practice is an exciting milestone, but it can also feel daunting. This **16-module, 20-CPD-point course** is designed to ease that transition. It provides practical guidance and support across all aspects of small animal practice, helping you navigate the realities of consults, case workups, and client expectations with greater confidence.

By building on the strong theoretical foundation you've gained at Onderstepoort, the course offers a clear framework for where to start, how to grow, and how to establish a solid footing in practice. Our goal is to give you the tools, clarity, and reassurance you need to step into private practice feeling capable and supported.

Our mission: To help you master those day-one competencies so you can walk into private practice feeling calm, confident, and ready to excel in this awesome profession of ours.

Your mentors: A dynamic team of South African veterinarians working around the world, along with veterinary coach Desiré Rees, and veterinary ophthalmologist - Dr Ramona Allen.

The goal: For you to love your work, take this challenging profession in your stride, and most importantly-

Dr Michelle Markram

BSc Hons, BVSc (UP, 2013)

- The pre-anaesthetic exam
- Anaesthetic machine refresher
- Protocols - routine
- Compromised patients
- Anaesthetics monitoring simplified
- Anaesthetic emergencies

MODULE 4

ULTRASOUND FUNDAMENTALS

Dr Kirstin Dinham

BVSc (UP, 2013), CertAVP, MRCVS

- How to use your machine effectively
- Patient factors and managing expectations
- Ultrasound image interpretation
- Recognition of the 'basic' organs
- Beginner ultrasound-guided procedures

2026 CCS VETS PREPPING FOR PRIVATE PRACTICE

Khula

MODULE 5

EMERGENCIES & CRITICAL CARE

Dr Tiffany Harries

BVSc (UP, 2010), PgCertSciTech, MVM, MRCVS

- PART 1 - Fundamentals of emergency and critical care
- PART 2 - Respiratory emergencies:
 - Triage, upper airway obstruction, CHF, pleural effusion, pneumothorax, thoracocentesis
- PART 3 - Common emergencies:
 - GDV, toxicities, snake bites

MODULE 6

CARDIORESPIRATORY

Dr Adam Quigley

BVSc (UP, 2013), CertAVP(VC), MRCVS

- Heart or lungs?
- Cardiorespiratory exam
- The dyspnoeic patient.. cringe... approach to respiratory emergencies
- Cardiorespiratory diagnostic imaging
- Practical airway sampling
- Common conditions

MODULE 7

GASTROINTESTINAL

Dr Anne-Marth Mullins

N Dip Eq Sc, BVSc (UP, 2015)

- The GIT consult
- Vomiting and diarrhoea
- Diagnostic tests for GIT cases
- Common gastrointestinal conditions
 - AHDS, IBD, foreign bodies, pancreatitis, parasites and more
- Common medications used for GIT cases

MODULE 8

DERMATOLOGY

Dr Nerintha Nadesan

BVSc (UP, 2013)

- Skin consults – how to save you time
- Atopy vs FAD vs Food allergies
- Ears – the recipe that works!
- NB dugs – topical and systemic
- Client communication
- Cytology is your friend!

Khula

MODULE 9

CYTOLOGY

Dr Nerintha Nadesan

BVSc (UP, 2013)

- Blood smears
- FNA tips
- When to biopsy
- Common neoplasia
- Skin and ears
- Urine sediment

MODULE 10

UROGENITAL

Dr Richard Smith BVSc (Hons) (UP, 1998)

Dr Tiffany Harries BVSc (UP, 2010), PgCertSciTech, MVM, MRCVS

- PART 1 - Urine analysis refresher
- PART 2 - Common urinary and reproductive conditions
 - A practical approach to presenting abnormalities, diagnostic roadmaps, incontinence and micturition disorders
- PART 3 - Feline urethral obstruction

MODULE 11

MUSCULOSKELETAL

Dr Claude Deyzel

BVSc (UP, 2004)

- A stepwise approach to the lameness exam
- Common musculoskeletal conditions
 - Fractures, hip dysplasia, elbow dysplasia, patellar luxation, CCLD, neoplasia and more
- Osteoarthritis - multimodal management
- When to refer

MODULE 12

NEUROLOGY

Dr Anne-Marth Mullins

N Dip Eq Sc, BVSc (UP, 2015), Small Animal Internship (OVAH - UP)

- A practical approach to the neurological consult
- Mastering the neurological examination
- Neurolocalisation and the neuro map
- Building a diagnostic work-up and differential list
- Client communication, prognosis and decision-making
- Common neurological conditions and their management

MODULE 13

ENDOCRINOLOGY

Dr Michelle Markram

BSc Hons, BVSc (UP, 2013)

- Diabetes mellitus
- Hyperadrenocorticism (Cushing's)
- Hypoadrenocorticism (Addison's)
- Hyperthyroidism
- Hypothyroidism

MODULE 14

APPLIED CLINICAL PATHOLOGY

Dr Nerintha Nadesan

BVSc (UP, 2013)

- Multisystemic
 - Pyrexia, anaemia, abdominal effusions, FIP
- AHDS, pancreatitis, triaditis, liver disease
- Urethral obstruction
- CKD
- Endocrine

MODULE 15

THE ANAEMIC PATIENT

Dr Michelle Markram

BSc Hons, BVSc (UP, 2013)

- A systematic approach to the anaemic patient
- Recognising and classifying anaemia
- Common causes and conditions
- Diagnostic approach and further investigations
- Practical tips for blood transfusions

MODULE 16

OPHTHALMOLOGY

Dr Ramona Allen

BSc (Med) Hons BVSc MMedVet (Ophthalmology) DipECVO MRCVS.

- The ophthalmic exam
- Ocular emergencies
- Common conditions
- Pharmacology - important drugs
- Diagnostic tests for the GP vet
- When to refer
